PCT/GB03/5587

I, the undersigned, being an officer duly authorised in accordance with Section 74(1) and (4) of the Deregulation & Contracting Out Act 1994, to sign and issue certificates on behalf of the Comptroller-General, hereby certify that annexed hereto is a true copy of the documents as originally filed in connection with the patent application identified therein.

In accordance with the Patents (Companies Re-registration) Rules 1982, if a company named in this certificate and any accompanying documents has re-registered under the Companies Act 1980 with the same name as that with which it was registered immediately before re-registration save for the substitution as, or inclusion as, the last part of the name of the words "public limited company" or their equivalents in Welsh, references to the name of the company in this certificate and any accompanying documents shall be treated as references to the name with which it is so re-registered.

In accordance with the rules, the words "public limited company" may be replaced by p.l.c., plc, P.L.C. or PLC.

Re-registration under the Companies Act does not constitute a new legal entity but merely subjects the company to certain additional company law rules.

6. If you are declaring priority from one or more earlier patent applications, give the country and the date of filing of the or of each of these earlier applications and (if you know it) the or each application number

Country

Priority application number  
(if you know it)

Date of filing  
(day / month / year)

7. If this application is divided or otherwise derived from an earlier UK application, give the number and the filing date of the earlier application

Number of earlier application

Date of filing  
(day / month / year)

8. Is a statement of inventorship and of right to grant of a patent required in support of this request? (Answer 'Yes' if:

YES

- a) any applicant named in part 3 is not an inventor, or
  - b) there is an inventor who is not named as an applicant, or
  - c) any named applicant is a corporate body.
- See note (d))

### Warning

*After an application for a patent has been filed, the Comptroller of the Patent Office will consider whether publication or communication of the invention should be prohibited or restricted under Section 22 of the Patents Act 1977. You will be informed if it is necessary to prohibit or restrict your invention in this way. Furthermore, if you live in the United Kingdom, Section 23 of the Patents Act 1977 stops you from applying for a patent abroad without first getting written permission from the Patent Office unless an application has been filed at least 6 weeks beforehand in the United Kingdom for a patent for the same invention and either no direction prohibiting publication or communication has been given, or any such direction has been revoked.*

### Notes

- If you need help to fill in this form or you have any questions, please contact the Patent Office on 08459 500505.*
- Write your answers in capital letters using black ink or you may type them.*
- If there is not enough space for all the relevant details on any part of this form, please continue on a separate sheet of paper and write "see continuation sheet" in the relevant part(s). Any continuation sheet should be attached to this form.*
- If you have answered 'Yes' Patents Form 7/77 will need to be filed.*
- Once you have filled in the form you must remember to sign and date it.*
- For details of the fee and ways to pay please contact the Patent Office.*

ENTERTAINMENT MACHINES

This invention relates to player-operable coin-operated gaming machines. As used herein the term coin is intended also to cover notes, tokens, charge or credit cards or any other means of supplying credit or monetary value.

In accordance with the invention of earlier patent application GB 0229968.3 there is provided a player-operable coin operated gaming machine of the kind having a main display device operable in play of a main game for displaying a selected combination of symbols at a win zone, which device has a plurality of symbol sequences which index through the win zone to provide a moving symbol display and then come to rest to cause the selected combination of symbols to be displayed, and wherein bonus events are made available on at least some occasions in relation to said main games, characterised in that said bonus events influence determination of said predetermined winning combinations, and when made available at least one of said bonus events is player-selectable from a range of such events to be effective for a plurality of games.

With this arrangement the player can derive much entertainment from the ability to select bonus events and thereby plan a strategy effective over a number of games.

However, much entertainment is also derived from the change in bonus events effective over multiple games.

According to the present invention therefore there is provided a

player-operable coin operated gaming machine of the kind having a main display device operable in play of a main game for displaying a selected combination of symbols at a win zone, which device has a plurality of symbol sequences which index through the win zone to provide a moving  
5 symbol display and then come to rest to cause the selected combination of symbols to be displayed, and wherein bonus events are made available on at least some occasions in relation to said main games, characterised in that said bonus events influence determination of said predetermined winning combinations, and when made available at least one of said  
10 bonus events is machine-selectable from a range of such events to be effective for a plurality of games.

With this arrangement, when the bonus events are made available the machine operates automatically to select at least one bonus event. This gives rise to changes in bonus events and consequent enhanced  
15 entertainment to the player even though the selection is made by the machine and not the player.

Selection of at least one bonus event from the range of such events most preferably occurs in correspondence with operation of a display device which provides a moving display which comes to rest to  
20 indicate the selected bonus event. In particular the display device may comprise a real or video-simulated rotatable reel having the bonus events around its periphery.

The nature of the bonus events, the number of games for which

the selected bonus event is maintained, and the main display device may be as described in the aforesaid earlier application.

The invention will now be described further by way of example only and with reference to the accompanying drawing which shows a  
5 diagrammatic front elevation of one form of a gaming machine according to the invention.

The gaming machine is a slot machine with a housing 1 with a front wall 2 having a main display panel 3, a coin slot 4, operating  
10 buttons 5, and a pay out opening 6.

The main display panel 3 defines a window 7 through which can be  
15 seen symbol-bearing peripheries of three side-by-side reels 8 which are rotatably mounted about a common horizontal axis.

A further symbol-bearing rotatable reel 9 can be seen through a  
further window 10.

15 In play of a game, after establishing credit, the reels 8 rotate and come to rest to display a combination of symbols on a win line in the window 7.

On occasions, when a special 'bonus event' symbol is displayed on one of the reels 8 on the win line a bonus event selection procedure is  
20 triggered. This causes the fourth reel 9 to rotate and then come to rest with one of the symbols on the reel 9 displayed through the window 7. -

The symbols on the reel 9 represent bonus events, from a range of different such events, such as "all wins doubled" etc. This automatically

selected bonus event now applies for a predetermined number of games, say ten games. That is, the player can now play ten games, after inserting adequate credit for ten games, and in each game the selected bonus event applies. At the end of the ten games, the bonus event no longer applies. A counter 11 decrements during game play.

Other features described in the earlier patent application can be combined with the present invention as appropriate.

It is of course to be understood that the invention is not intended to be restricted to the details of the above embodiment which are described by way of example only.

FIG 1

**This Page is Inserted by IFW Indexing and Scanning  
Operations and is not part of the Official Record**

**BEST AVAILABLE IMAGES**

Defective images within this document are accurate representations of the original documents submitted by the applicant.

Defects in the images include but are not limited to the items checked:

☒ ~~BLACK BORDERS~~

☐ IMAGE CUT OFF AT TOP, BOTTOM OR SIDES

☒ ~~FADED TEXT OR DRAWING~~

☒ ~~BLURRED OR ILLEGIBLE TEXT OR DRAWING~~

☐ SKEWED/SLANTED IMAGES

☐ COLOR OR BLACK AND WHITE PHOTOGRAPHS

☐ GRAY SCALE DOCUMENTS

☐ LINES OR MARKS ON ORIGINAL DOCUMENT

☐ REFERENCE(S) OR EXHIBIT(S) SUBMITTED ARE POOR QUALITY

☐ OTHER: \_\_\_\_\_

**IMAGES ARE BEST AVAILABLE COPY.**

**As rescanning these documents will not correct the image problems checked, please do not report these problems to the IFW Image Problem Mailbox.**
